

King Vision® aBlade video laryngoscope

Portable. Affordable. Durable.

King Vision® video laryngoscope

- Advanced imaging technology and unparalleled ergonomic design. Visionary performance in the palm of your hand.
- Unique flexibility from the choice of two blade types standard and channeled - depending on the user technique and complexity of the airway. Choose what is right for you.
- King Vision® is designed to visualise the vocal cords indirectly which can help minimize the need for tissue manipulation and improve the ability to see anterior airways.

- King Vision® is light weight, self-contained, battery operated and water resistant.
- King Vision® can be used continuously about 80 minutes making it highly portable.
- Blades are individually packaged. Each blade is disposable, eliminating concerns about cross contamination.
- King Vision® has a High Intensity TFT LCD display that creates clear image viewing in 160°panoramic field which is also beneficial in teaching situations.

- Disposable aBlades allow economical use of the King Vision® video laryngoscope for all intubations. With the addition of the aBlade configuation you have an excellent solution to the problem of limited availability of advanced imaging devices in the OR.
- With the King Vision® you can improve patient care by having high performance visualisation capabilities for every intubation, at an affordable price.

compatible with external monitors

 The robust, full-colour, non-glare display can resist repeated cleaning

that can withstand repeated use.

and normal use wear and tear. The video

adapter is made from duarable materials

and recording devices.

King Vision® has been designed with the intention to make a revolutionary series of high performance portable video laryngoscopes. The King Vision® combines the convenience of a durable reusable, video system with a disposable blade at a price that's affordable for all of your intubations, difficult and routine.
